1. Are the following sentences true (T) or false (F):
   - The common vegetation in deciduous forests is holm oak and cork oak trees. (T)
   - Drought especially affects the Spanish Cantabrian coast. (T)
   - The Picos de Europa, Doñana and Garajonay are some of Spain’s national parks. (T)

2. Draw arrows to match the vegetation and fauna with the type of climate.

   - Laurisilva
   - Fox
   - Mountain goat
   - Cork tree
   - Beech tree
   - Rabbit
   - Oceanic climate
   - Mediterranean climate
   - Subtropical climate
   - Alpine climate

3. Choose the correct answer.
   a) The rivers of the Cantabrian vertiente:
      - ☐ are long and the flow is irregular.
      - ☐ are short and the flow is irregular.
      - ☐ are short and the flow is regular.
   b) The Mediterranean inland climate has:
      - ☐ warm temperatures all year round and scarce rainfall.
      - ☐ mild winters, hot summers and abundant rainfall.
      - ☐ cold winters, hot summers and scarce rainfall.

4. Locate these places on the map of Spain.
   a) The mountains surrounding the Meseta.
   b) The rivers of the Mediterranean vertiente.
   c) The Ebro and Guadalquivir river valleys.
Answers

1. False. The vegetation in deciduous forests is beech trees, oak, moorland and grassland.
2. False. Drought especially affects the southern and eastern part of the Iberian Peninsula.
3. True.
