TABLE OF CONTENTS

Principado de Asturias

3° ESO

UNIT	FINAL TASK	DEVELOPMENT	FINAL PAGES
Project planning	Designing a portable air-conditioning unit	 Technology solves problems The different aspects of technology Stages of a technological process 	ANALYSIS OF A TECHNOLOGICAL OBJECT: Formal, technical, functional and socioeconomic analysis of an object PROCEDURES: Creation of a personal collaborative ITC environment FINAL ACTIVITIES FINISHING THE FINAL TASK
Representational systems	Designing a sculpture	 Presentation of an ensemble Types of perspective	REPRESENTATION OF PIECES IN 3D: Representation in 3D with Google Sketchup 3D PRINTING OF A PIECE: Reproduction of the sculpture with 3D printing PROCEDURES: Models with developed plans FINAL ACTIVITIES FINISHING THE FINAL TASK
Plastic and textiles	Designing an information campaign about plastics	 Plastic materials 1.1 The origin of plastic materials 1.2 Transformation of plastics 1.3 Properties Classification of plastics 2.1 Classification according to structure 2.2 Industrial plastics Forming techniques 3.1 Extrusion 3.2 Calendering 3.3 Vacuum forming 3.4 Moulding Manipulation techniques 4.1 Measuring 4.2 Marking and tracing 4.3 Cutting 4.4 Perforating 4.5 Refining 4.6 Joining Textile materials 5.1 Natural fibres 5.2 Synthetic fibres 	PROCEDURES: Construction of a vehicle ANALYSIS OF TECHNOLOGICAL OBJECTS: Objects made with plastic and textile materials FINAL ACTIVITIES FINISHING THE FINAL TASK

UNIT	FINAL TASK	DEVELOPMENT	FINAL PAGES
Plastic materials and textiles	Designing an information campaign about plastics	 Plastic materials The origin of plastic materials Transformation of plastics Transformation of plastics Classification of plastics Classification according to structure Industrial plastics Forming techniques Extrusion Calendering Vacuum forming Moulding Manipulation techniques Manipulation techniques Measuring Cutting Verticing Cutting Refining Industrial plastics 	PROCEDURES: Construction of a vehicle ANALYSIS OF TECHNOLOGICAL: Objects made with plastic and textile materials FINAL ACTIVITIES FINISHING THE FINAL TASK
Stone and ceramic materials	Recognising stone and ceramic materials	 Stone materials Stone materials Obtaining stone materials Natural stones Conglomerants Artificial stones Ceramic materials General properties The process of obtaining ceramic materials Classification of ceramic materials Glass Forming techniques 	PROCEDURES: How to build a reinforced concrete pillar FINAL ACTIVITIES FINISHING THE FINAL TASK
Electricity	Designing and manufacturing an electronic game and an advertisement for it	 Electrical charge Electric current Conducting and insulating materials Electric circuit Generators Conductors Receivers Switching and control elements Protective elements Representation and symbols The effects of electric current Heat Light Movement Basic electrical variables and measuring instruments Voltage, intensity and electrical resistance Electrical energy and power Ohm's law Serial and parallel circuits Connecting generators Rational use of electricity 	SIMULATION OF CIRCUITS: Simulation of circuits using the Yenka program PROCEDURES: Building circuits FINAL ACTIVITIES FINISHING THE FINAL TASK

	-		
The computer and our projects	Digital wall	 Computer architecture Motherboard connection and devices Connection of external devices The operating system What tasks does an operating system carry out? How does the operating system start an application? Operating system functions Installation of programs and applications Installation of programs and applications Installing and uninstalling Windows Installing and uninstalling Linux Mobile operating systems The spreadsheet in technology Basic operations Graphics Spreadsheet applications Soft content of systems Fresentations Slide transitions Adding video and sound Image processing Editing images Audio processing Editing video Video processing Editing video Video processing Editing video Other types of presentation Augmented reality QR codes Arks Arks Images 	FINAL ACTIVITIES FINISHING THE FINAL TASK
Digital information and the Web	Finding out about our Personal Learning Environment and possibilities of expanding it	 WEB 1.0, WEB 2.0 and WEB 3.0 Information sources Web pages News on demand (RSS technology) Information management Social bookmarking Working with the cloud Sharing information Horizontal social networks Vertical social networks Creating information Web page Blogs Wikis Information exchange on the Internet User licences 	PROCEDURES: Apps for mobile devices FINAL ACTIVITIES

- 1. Design and construction of an electrical circuit for lighting
- 2. Design and construction of a cable railway
- 3. Design and construction of a self-propelled car
